

What is Wellcomm used for?

Wellcomm is a speech and language toolkit that is designed **to assess children's speech and language skills**. Not how they talk but the language they use and the language and grammar they understand. The first Wellcomm Toolkit is designed from birth to 6 years old, so is generally used in Nursery, Reception and Year One.

All children in our Nursery School are screened when they enter the school this enables us to ensure that we are helping to build upon the vocabulary and understanding that they have already acquired.

Children are assessed using a traffic light system

The toolkit come with an age-appropriate 'Big Book of Ideas' with targeted activities to help you take appropriate action straight away. Activities and strategies can also be shared with parents for use in the home learning environment.

Support is provided for children who are referred to a speech and language therapist and those who are not referred.
